Robotics and Autonomous Systems

www.elsevier.com/locate/robot

Contents Volume 29

Selected Papers of the Fourth International Symposium on Distributed Autonomous Systems (DARS'98)
Guest Editors: Rüdiger Dillmann, Tim Lüth, Paolo Dario, Heinz Wörn

Editorial 1

M. Asada and H. Kitano
The RoboCup Challenge (Keynote Introduction) 3

Y. Aiyama, M.Hara, T. Yabuki, J. Ota and T. Arai
Cooperative transportation by two four-legged robots with implicit communication 13

Y. Arai, T. Fujii, H. Asama, H. Kaetsu and I. Endo
Collision avoidance in multi-robot systems based on multi-layered reinforcement learning 21

P. Bison, G. Chemello, C. Sossai and G. Trainito
Using a structured beacon for cooperative position estimation 33

H. Friedrich, O. Rogalla and R. Dillmann
Communication and propagation of action knowledge in multi-agent systems 41

A. Martinoli, A.J. Ijspeert and F. Mondada
Understanding collective aggregation mechanisms: From probabilistic modelling to experiments with real robots 51

E. Pagello, A. D'Angelo, F. Montesello, F. Garelli and C. Ferrari
Cooperative behaviors in multi-robot systems through implicit communication 65

E. Yoshida, S. Murata, K. Tomita, H. Kurokawa and S. Kokaji
An experimental study on a self-repairing modular machine 79

J. Zhang, Y. von Collani and A. Knoll
Interactive assembly by a two-arm robot agent 91

Competition Corner correspondent change 101

Robotics Competition Corner 103

Calendar 107

Special Issue: Intelligent Embodied Autonomous Agents
Guest Editors: Gaurav S. Sukhatme

G.S. Sukhatme
Intelligent embodied autonomous agents (Editorial) 109

B. Yamauchi
Decentralized coordination for multirobot exploration 111

M. Fujita, H. Kitano and K. Kageyama
A reconfigurable robot platform 119

M. Veloso, P. Stone and K. Han
The CMUnited-97 robotic soccer team: Perception and multi-agent control 133

K.Z. Haigh and M.M. Veloso
Learning situation-dependent costs: Improving planning from probabilistic robot execution 145

G. Wasson, D. Kortenkamp and E. Huber
Integrating active perception with an autonomous robot architecture 175

F. Michaud and M.J. Matarić
Representation of behavioral history for learning in nonstationary conditions 187

Calendar 201

K. Nilsson and R. Johansson
Integrated architecture for industrial robot programming and control 205

S.A. Huber, M.O. Franz and H.H. Bülthoff
On robots and flies: Modeling the visula orientation behavior of flies 227

F. Conticelli, B. Allotta and C. Colombo
Hybrid visual servoing: A combination of nonlinear control and linear vision 243

S.A. Bazaz and B. Tondu
Minimum time on-line joint trajectory generator based on low order spline method for industrial manipulators 257

J. Ureña, M. Mazo, J.J. García, Á. Hernández and E. Bueno
Classification of reflectors with an ultrasonic sensor for mobile robot applications 269

Calendar 281
